PLANT AND SOIL

Contents Volume 217, Nos. 1/2 1999

THE SUPPORTING ROOTS – STRUCTURE AND FUNCTION

Selected papers from the 1st International Conference devoted to the structural roots of trees and woody plants

Guest editor: A. Stokes
Laboratoire de Rhéologie du Bois de Bordeaux, CNRS/INRA Université Bordeaux I, Domaine de l'Hermitage, Cestas Gazinet 33610, France

The development of symmetry, rigidity and anchorage in the structural root system of conifers
M.P. Coutts, C.C.N. Nielsen and B.C. Nicoll 1–15

Strain distribution during anchorage failure of *Pinus pinaster* Ait. at different ages and tree growth response to wind-induced root movement
A. Stokes 17–27

Root deformation in plantations of container-grown Scots pine trees: effects on root growth, tree stability and stem straightness
A. Lindström and G. Rune 29–37

Root strength, growth, and rates of decay: root reinforcement changes of two tree species and their contribution to slope stability
A. Watson, C. Phillips and M. Marden 39–47

Structural root architecture of 5-year-old *Pinus pinaster* measured by 3D digitising and analysed with AMAPmod
F. Danjon, D. Bert, C. Godin and P. Trichet 49–63

Root architecture, early development and basal sweep in containerized and bare-rooted Douglas fir (*Pseudotsuga menziesii*)
E. Sundström and M. Keane 65–78

The effect of cultivation technique on root and shoot biomass production by young Sitka spruce (*Picea sitchensis* (Bong.) Carr.) trees on surface water gley soils
J.M. Wills, E. Sundström, J.J. Gardiner and M. Keane 79–90

Influence of cultivation method on root grafting in Norway spruce (*Picea abies* (L.) Karst.)
T. Külla and K. Lõhmus 91–100

Comparison of radial increment and volume growth in stems and roots of *Quercus petraea*
M. Drexhage, F. Huber and F. Colin 101–110

Clonal strategies of a woody weed: *Melia azedarach*
G.M. Tourn, M.F. Menvielle, A.L. Scopel and B. Pidal 111–117

Clonal variation in above- and below ground growth responses of *Populus tremuloides* Michaux: Influence of soil warming and nutrient availability
J.S. King, K.S. Pregitzer and D.R. Zak 119–130

Above- and below-ground growth of white spruce seedlings with roots divided into different substrates with or without controlled-release fertilizer
M.J. Krasowski, J.N. Owens, L.E. Tackaberry and H.B. Massicotte, **131–143**

Root-infecting fungi associated with a decline of longleaf pine in the southeastern United States
W.J. Otrosina, D. Bannwart and R.W. Roncadori **145–150**

Why are laterals less affected than main axes by homogeneous unfavourable physical conditions? A model-based hypothesis
P. Thaler and L. Pagès **151–157**

Effect of water stress on root meristems in woody and herbaceous plants during the first stage of development
D. Chiatante, A. Di Iorio, L. Maiuro and S.G. Scippa **159–172**

Influence of soil temperature on root freezing tolerance of Scots pine (*Pinus sylvestris* L.) seedlings
E. Stattin and A. Lindström **173–181**

An approach to minirhizotron root image analysis
T. Vamerali, A. Ganis, S. Bona and G. Mosca **183–193**

A field method of determining NH_4^+ and NO_3^- uptake kinetics in intact roots: Effects of CO_2 enrichment on trees and crop species
H. BassiriRad, S.A. Prior, R.J. Norby and H.H. Rogers **195–204**

Pine root structure and its potential significance for root function
C.A. Peterson, D.E. Enstone and J.H. Taylor **205–213**

Tracheids in white spruce seedling's long lateral roots in response to nitrogen availability
M.J. Krasowski and J.N. Owens **215–228**

Root structure and arbuscular mycorrhizal colonization of the palm *Serenoa repens* under field conditions
J.B. Fisher and K. Jayachandran **229–241**

Effects of liming on rhizosphere chemistry and growth of fine roots and of shoots of sessile oak (*Quercus petraea*)
M.R. Bakker, R. Kerisit, K. Verbist and C. Nys **243–255**

A new approach to the investigation on the tonogenic groups of root cell walls
N.R. Meychik and I.P. Yermakov **257–264**

Author Index **265**
